

JERMAINE C. PASAMBA

Santa Maria, Bulacan | jermaine.pasamba@gmail.com | 09426963787 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Highly motivated Computer Science graduate targeting a Junior Developer role. Possesses strong foundations in full-stack development, including API integration. Committed to delivering high-quality, responsive web and mobile solutions while leveraging proactive problem-solving skills to support automation and business objectives.

EXPERIENCE

Web Developer Intern

NB Consulting Inc.

June 2025 – July 2025

- Developed and maintained web-application called RecrueIT using FlutterFlow and Supabase, aligning with modern responsive design standards.
- Collaborated on UI/UX improvements and integrated API-powered features (Groq) to create a simple AI Chatbot.
- Participated in weekly team reviews to manage project tasks almost a finish project up to 80%, troubleshoot performance issues, and meet delivery deadlines.

SKILLS

Web: Next.js, ReactJS, TypeScript, JavaScript, HTML5, CSS3, FlutterFlow

Back-End/DB: Laravel, PHP, Supabase, Python (FastAPI), MySQL

Game Development: Unity, C# Programming, Interaction System Design

Asset Creation & Design: Pixel Art & Sprite Animation (Aseprite), UI/UX Workflow Design, Canva

Tools/APIs: Git/GitHub, Figma, Postman, Groq API, Phaser 3

PROJECTS

QTime: Quantum-Inspired Room Allocation System

Bulacan State University (Thesis)

Oct 2025 – April 2026

- Main Developer of a robust quantum scheduling platform using Next.js and Supabase; implemented complex backend logic with Python and database design.
- Ensured optimal user experience and system reliability by reducing scheduling conflicts through algorithmic optimization within minutes of scheduling calculation.
- Conduct a user experience observation, gathered enough data to ensure the system is product ready for complex scheduling school system.

Word Sprint: Island Escape

Simple HTML5 Word Game (solo)

July 2026 - July 2026

- Engineered a browser-based educational game using Phaser 3.80.1 and JavaScript, focusing on responsive UI and game mechanics.
- Managed cross-platform compatibility and hosted the application via Vercel for public access

IT Ticketing System

Web Ticketing System (solo)

April 2026 – May 2026

- Developed a centralized IT ticketing system to streamline the full request lifecycle, enabling efficient tracking, prioritization, and resolution of support requests.
- Engineered a robust auditing framework to maintain a comprehensive history of ticket actions and communications, ensuring accountability and operational transparency.

Lainfern Adventure

Unity 2D Game (Group Project)

July 2026 - July 2026

- Developed a nature-inspired adventure game using Unity, focused on immersive exploration and discovery mechanics.
- Implemented a comprehensive logbook system to track user findings, designed custom pixel art sprites for creatures such as fish and animals using Aseprite, and published the project as a live demo on Itch.io.

EDUCATION

Bulacan State University

Bachelor of Science in Mathematics with specialization in Computer Science (BSM CS)

Aug 2022 – June 2026

- **Member & Organization:** Microsoft Student Organization Community
- **Thesis Project:** Developed "QTime," a web-based room allocation scheduling system utilizing Quantum-Inspired Annealing (QIA) and Quadratic Unconstrained Binary Optimization (QUBO).
- **Achievement:** Recognized as a competitive participant for the thesis system development, including formal project certification.

Early Christian College of Arts and Technology (ECCAT)

Santa Maria, Bulacan (JHS-SHS STEM)

June 2016 – March 2022

- **Member & Organization:** Peer Counseling Club, Math Wizard Club, Book Lovers Club, Chess Club
- **Achievement:** Consistent with Honors, Grade 8 Math Quiz Bee Section Representative, Participation on Robotics Club

Santa Maria Elementary School

Kinder – Elementary School

June 2009 – March 2016

- **Achievement:** Consistent with Honors, Conduct Awardee.
