PROFESSIONAL SUMMARY

Versatile Computer Science graduate and software engineering professional with comprehensive technical expertise spanning full-stack web development, API integrations, software support, database management, and system administration. Adaptable problem-solver capable of driving high-impact solutions across diverse computing domains, from scalable web architectures and backend services to developer tooling and automated enterprise systems.

TECHNICAL SKILLS

Programming

- Languages:** Python, JavaScript, TypeScript, PHP, C#
- Web & Frameworks:** Next.js, ReactJS, FastAPI, Laravel, HTML5, CSS3, FlutterFlow
- Databases & Tools:** Supabase, MySQL, Git/GitHub, Postman, Figma, Vercel, WordPress
- Systems & Support:** Software Maintenance, User Support, Data Encoding, System Monitoring, Documentation

PROFESSIONAL EXPERIENCE

Junior IT Software and Systems Development Support Aug 2026 – Present

Project REIMS

- Assisted in the design, development, testing, and maintenance of core software applications while ensuring robust system deployment and user support.
- Executed database management, accurate data encoding, and continuous system monitoring activities to optimize application performance.
- Collaborated closely with the project team in software development sprints, technical meetings, and other assigned IT-related operations.

Junior Software Development Assistant April 2026 – July 2026

Project REIMS

- Prepared comprehensive technical and project documentation, including detailed minutes of meetings for stakeholder reviews.
- Re-developed, updated, and improved existing web systems utilizing WordPress to elevate organizational web presence.

Web Developer Intern June 2025 – July 2025

NB Consulting Inc.

- Developed and maintained web application RecrueIT using FlutterFlow and Supabase, aligning with modern responsive design standards.
- Collaborated on UI/UX improvements and integrated API-powered features (Groq API) to build a functional AI Chatbot.
- Participated in weekly team reviews to manage project tasks (reaching 80% completion), troubleshoot performance issues, and meet delivery deadlines.

PROJECTS

QTime: Quantum-Inspired Room Allocation System (Thesis) Oct 2025 – April 2026

Bulacan State University

- Main Developer of a robust quantum scheduling platform using Next.js, Supabase, and Python (FastAPI), implementing QIA and QUBO algorithms to reduce scheduling conflicts.
- Ensured optimal user experience and system reliability by achieving rapid algorithmic optimization and comprehensive university scheduling readiness.

EDUCATION

Bulacan State University — BS in Computer Science Aug 2022 – June 2026

Active Member, Microsoft Student Organization Community | Thesis: QTime Room Allocation System utilizing QIA & QUBO.
