PROFESSIONAL SUMMARY

Software Developer and Systems Integrator with a focus on building complex, full-stack applications and automated systems. Proven ability to architect backend solutions and integrate AI-driven services into functional web applications. Passionate about leveraging advanced optimization algorithms to solve real-world scheduling and data processing challenges.

EXPERIENCE

Web Developer Intern

June 2025 – July 2025

Nantes Bautista Consulting

- Served as the primary technical developer for a web-app system, utilizing FlutterFlow and Supabase to transition legacy processes into a modern digital interface.
- Built and implemented complex system logic, including advanced search filtering and database queries, overcoming technical limitations in a low-code environment.
- Collaborated with a cross-functional team to refine UI/UX components and ensure system performance met business objectives.

PROJECTS

QTime: Quantum-Inspired Room Allocation System

October 2025 – April 2026

- Developed a web-based platform to solve complex university room-scheduling problems using Quantum-Inspired Annealing (QIA) algorithms.
- Architected the full-stack system using Next.js and Supabase to optimize resource allocation and generate automated schedules.

AI-Driven Automation & Integration Systems

Self-Made Project 2026

- Built and deployed Python-based management tools for YouTube and video automation, streamlining content deployment workflows.
- Developed a floating chatbot interface for web applications by integrating the Groq API, enhancing real-time user interactivity.
- Created an enterprise-focused IT ticketing system to automate internal business processes.

Other Projects in Portfolio (Link above)

EDUCATION

Bulacan State University

August 2022 – June 2026

Bachelor of Science in Mathematics with Specialization in Computer Science

- Organization/Club: BulSu Microsoft Student Community

Early Christian College of Arts and Technology

June 2016 – May 2022

- Designed and optimized a robotic control system (Robotics)
- Math Quiz Bee Section Representative
- Memberships: Peer Counseling, Math Wizard, Book Lovers, Chess Club

Santa Maria Elementary School

June 2007 – March 2016

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#, C++

Frameworks & Tools: Next.js, FastAPI, FlutterFlow, Supabase, MySQL, Git, GitHub

AI & Dev Tools: Cursor, GitHub Copilot, Claude, Gemini, OpenCode

Other Tools: Canva, Figma, Adobe Photoshop, Adobe Premiere, Capcut, MATLAB, LaTeX, Unity3D, Aseprite

ADDITIONAL INFORMATION

Languages: English, Tagalog

Professional Traits: Hardworking, adaptable problem-solver with a strong capacity for both independent work and team collaboration.

Key Competencies: Demonstrates a proven track record in building complex, modern backend architectures and artificial-intelligence-automated systems.
